Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-9 are drawn to a method for identifying plausible sources of error in RAS comprising identifying variable of the RAS, determining a hypothesis about the variable, providing probability of the hypothesis, identifying a change in value in at least one variable, determining an evidentiary finding and evaluating the probability of the hypothesis, classified in class 705, subclass 37.

Invention II: Claims 10-20 are drawn to a method and system for identifying plausible sources of error in FRA comprising identifying variables of the FRA, implementing a Bayesian network to represent implications between and among the variables, classified in class 705, subclass 39.

2. The inventions I and II are distinct, each from the other because of the following reasons:

Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable.

These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case, inventions I and II have different mode of operation such implementing a Bayesian network to represent implications between and among the variables. See MPEP § 806.05(d).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. A telephone call attempt was made on November 3, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.
